I would add that all water drained and flushed yesterday was captured in the sanitary according to KZoo water officials (they seem focused on assuring that now)

I think that prep for the Town Hall open house and meeting on Tuesday are gearing up . DEQs press officer , Mel Brown, has reached out to us to include us in prep as they proceed .

The issues that I'm seeing which will be prominent discussion topics are :

What's the source?

What/ how many private wells ?

How long for KZoo system hookup?

Where is the flush water being discharged?

Ralph, here are the quick notes I took during the call. Please add any other items I missed . I will not likely call in tomorrow as I will be driving and pulling the trailer.

Thank you,
